Company Description:

Located in Mukwonago Wisconsin, Badger Color Concentrates is an industry leader in masterbatch and liquid color manufacturing for the plastics industry. At Badger Color, we strive to take your challenges and turn them into triumphs by providing the color you want at a competitive price, which gives you the ability to showcase and sell your product effortlessly.

Badger Color has been bringing color to life since 1998 with Injection Molded Products, Blow Molded Services, Extrusion Grade Products, and most recently Liquid Color. Badger Color is committed to providing its customers with quality, delivery, and technical service second to none in the Industry. This standard is achieved through an aggressive understanding of our competition, our customers' application, and cross-functional commitments to continual improvement.

Inside our 60,000 square foot facility in Mukwonago, WI, and our 45,000 square foot facility in Kings Mountain, NC, are many of the industry's best innovators and formulators. Our research team is renowned for developing new formulations to make our products more aesthetically pleasing. We get you the color and effect you're looking for the first time.
